

Therapy Connections

Pediatric Orthopedics

Therapy Connections is excited to extend services to pediatric orthopedic clients with varying concerns. Therapist directed exercises and activities improve muscular strength, range of motion, and endurance.

Make It Move Again!

Therapy Connections will provide a wide range of therapeutic services using evidence based techniques, and an interdisciplinary approach to allow children with disabilities to achieve their highest potential

Services are provided to children with various diagnoses that include but are not limited to pain, gait dysfunction, muscle weakness/low tone, joint dysfunction, postural abnormalities, and acute injury.
